

MURCHISON FALLS NATIONAL PARK

Responsible Tourism

Statement Of Commitment

1. We commit to actively support conservation initiatives and contribute to the protection of biodiversity in Murchison Falls National Park.
2. We commit to always have active engagement with our neighbouring communities, and to contribute to their socio-economic development thus fostering a mutually beneficial relationship.
3. We commit to preserving and celebrating the rich cultural heritage of Uganda.
4. We commit to being a source of education for responsible travel. Through information sharing and immersive experiences, we empower our guests to make sustainable choices and appreciate the delicate balance between tourism and nature.
5. We commit to minimizing our carbon footprint by implementing sustainable practices, embracing renewable energy sources, and continually seeking innovative solutions to reduce, reuse, and recycle.
6. We commit to continually assess and improve our practices, staying abreast of advancements in sustainable tourism and adjusting our operations to align with the evolving standards of responsible travel.

Energy Conservation

SOLAR POWERED OPERATIONS:

Embracing a steadfast commitment to environmental sustainability, Nile Safari Lodge runs 80% of its operations using solar energy. We have installed 120 solar panels, harnessing the clean and renewable power of the sun.

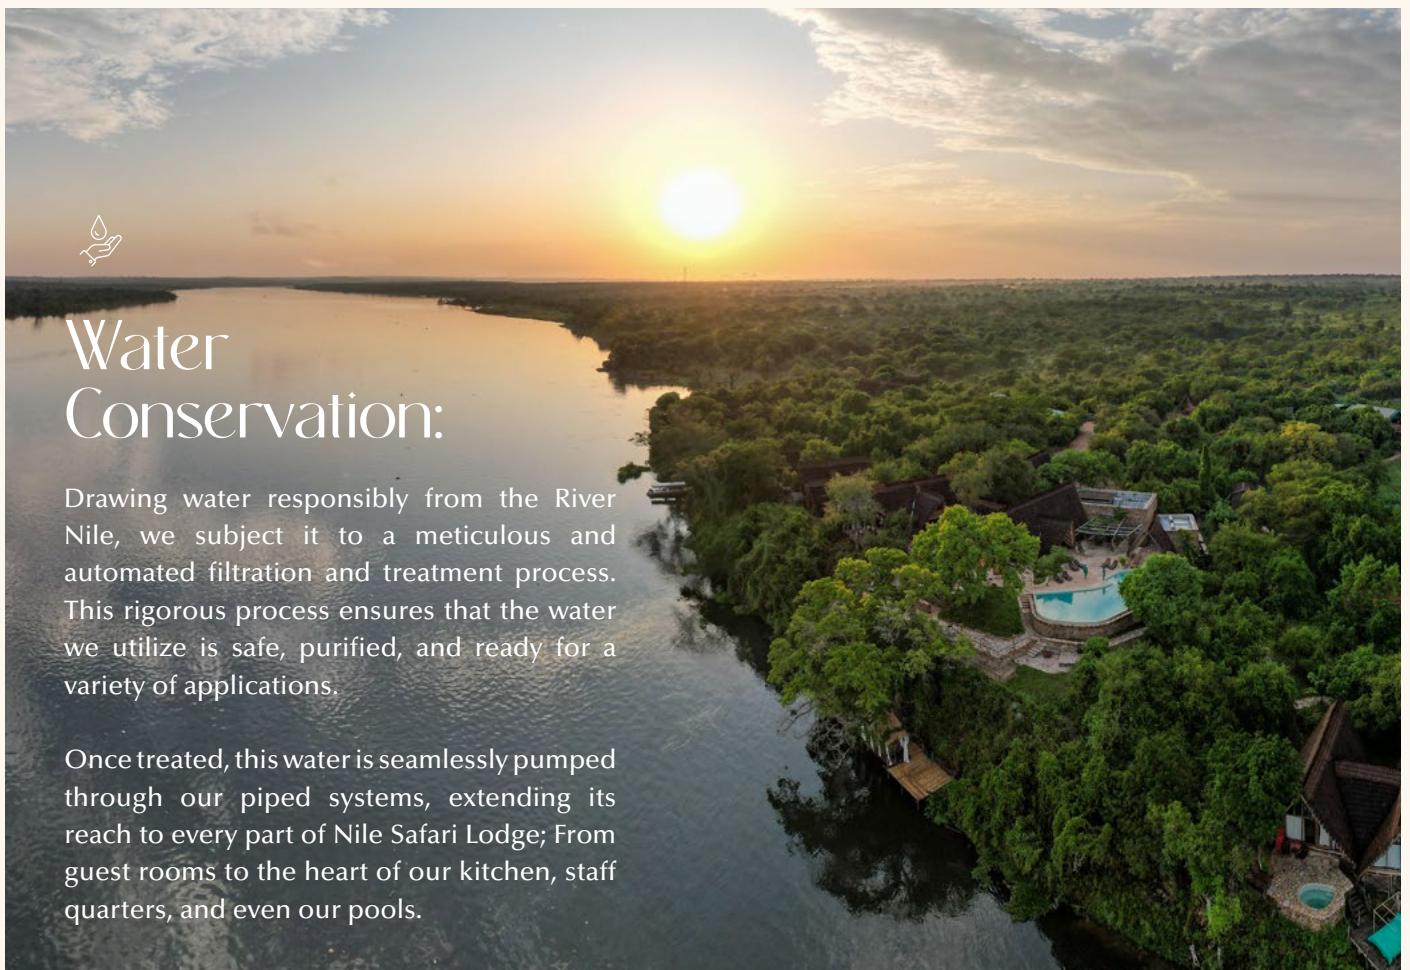

This solar infrastructure powers essential functions throughout the lodge, from the ambient lighting that graces every corner to the water heating system, ensuring that your experience is not just immersed in the beauty of nature but is also harmonized with responsible energy practices.

Water Conservation:

Drawing water responsibly from the River Nile, we subject it to a meticulous and automated filtration and treatment process. This rigorous process ensures that the water we utilize is safe, purified, and ready for a variety of applications.

Once treated, this water is seamlessly pumped through our piped systems, extending its reach to every part of Nile Safari Lodge; From guest rooms to the heart of our kitchen, staff quarters, and even our pools.

Biodiversity Conservation:

We proudly support the “Snares to Wares” youth anti-poaching programme. This initiative not only aims to rehabilitate poachers but also serves as a beacon for community education on wildlife and environmental conservation. The youth involved showcase their creativity by repurposing wire snares into captivating sculptures of wildlife, available for purchase at our lodge’s gift shop.

All proceeds from these items go back into building the community and protection of the wildlife in Murchison Falls National Park.

Cultural Conservation:

Preserving and celebrating cultural heritage is woven into the fabric of Nile Safari Lodge. Once a week, our guests are entertained by the enchanting tunes of the Adungu band, giving them a harmonious journey into the local musical traditions.

To deepen cultural understanding, we guide our guests on enlightening community walks that unravel the intricacies of our neighbouring community’s culture. These walks are an insightful exploration fostering connections and knowledge.

Our gift shop is a treasure trove of artifacts, each piece a testament to the vibrant craftsmanship of the local community. By curating these cultural experiences, we not only entertain but also contribute to the preservation of the cultural heritage that makes our surroundings so unique.

Community Socio-economic Wellbeing:

At Nile Safari Lodge, community empowerment is central to our operations. 80% of our staff are recruited locally and undergo rigorous training in hospitality excellence, from housekeeping to management.

Beyond employment, we foster local sustainability by:

- **Sourcing Supplies:** Prioritizing local crop cultivation to stock our lodge.
- **Supporting Artisans:** Partnering with local craft designers to feature their work in our gift shop.
- **Capacity Building:** Investing in skill development to build professional confidence and expertise within the region.

Sustainable Agriculture

ON-SITE GREEN HOUSE

Our commitment to sustainable agriculture is showcased through our on-site greenhouse. We cultivate a variety of herbs and vegetables, proudly adhering to organic practices that exclude pesticides and chemical fertilizers.

This initiative not only ensures a fresh and healthy supply for our kitchen but also contributes to a greener and more environmentally conscious approach to food production.

Waste Management Policy

Our waste management policies highlight the Lodge's commitment to responsible environmental practices of turning waste into a valuable resource while actively participating in the reduction of plastic waste.

- All waste water undergoes an automated thorough three-phase treatment process before meticulous testing and responsible disposal.
- Compost waste finds a meaningful purpose in our on-site greenhouse, contributing to the cultivation of herbs and vegetables without the use of pesticides or chemical fertilizers.
- Due to our stringent no-plastics policy, we provide our guests with reusable water bottles upon arrival for personal use on the property. This contributes to our efforts in reducing plastic waste

Environmentally Friendly Amenities

Our amenities, including handwash, lotion, shampoo, and conditioner, are sourced from environmentally responsible body product manufacturers that prioritize natural ingredients.

We obtain these items from natural cosmetic suppliers who share our commitment to being responsible stewards of the planet and promoting kindness towards its inhabitants.

Notably, all our amenities are provided in refillable containers, further contributing to our sustainable practices.
